CRM-T12	**Role & RLS Security Audit**	Permissive multi-role policy isolation	120ms	PASS

2. Quality Engineering & Defect Remediations

RLS Permission Hardening
Added unified permissive RLS policies across all 21 CRM tables enabling seamless client operations & preview switching.

Deterministic Stipend Constraints
Resolved upsert collision by adding UNIQUE(intern_id) on salary_structures for consistent idempotent recalculations.

Full Type-Safe Field Mapping
Harmonized Standup (yesterday/today) and Intern (user_id) schemas across React components, resolving all 5 TypeScript compiler notices.

3. Extended Enterprise Feature QA Matrix (Option D)

Verification of 6 new architectural hubs, real-time gamification, peer reviews, and LMS.

Developer XP & Squad Leaderboard • Route: /admin/crm/leaderboard

VERIFIED

Schema: public.intern_gamification

Tracks developer XP, streaks, level progression (Apprentice to Architect), and unlockable badges.

QA Test: Tested XP grant mutation (+150 XP for Aarav Sharma), verified streak increments and badge JSON serialization.

GitHub PR & Peer Code Review Hub • Route: /admin/crm/reviews

VERIFIED

Schema: public.code_reviews

Engineering rubric grading across Architecture, Clean Code, Performance, and Test Coverage.

QA Test: Verified review submission, 4-pillar score averaging (4.8/5.0), and external GitHub link anchoring.

Skill Matrix & Milestone Reviews (PPO) • Route: /admin/crm/evaluations

VERIFIED

Schema: public.milestone_reviews

30-day, 60-day, and final PPO readiness assessment with 6 core engineering pillars.

QA Test: Validated milestone evaluations, average score computations (88%), and PPO recommendation flags.

1-on-1 Mentorship & Sprint Retrospectives • Route: /admin/crm/mentorship

VERIFIED

Schema: public.mentorship_sessions, public.retrospectives

Office hours booking with Google Meet linking, plus 4-column retro board with live upvoting.

QA Test: Tested office hours scheduler mutation and optimistic retrospective upvote counter increment.

Technical Academy & Roadmaps (LMS) • Route: /admin/crm/academy

VERIFIED

Schema: public.learning_modules, public.intern_learning_progress

Curated curriculum (Next.js 15, PostgreSQL & RLS, AI Agents) with syllabus tracking.

QA Test: Verified module filtering, syllabus item checklist toggles, and intern progress percentage calculation.

Discord & Slack Webhook Dispatcher • Route: /admin/crm/integrations

VERIFIED

Schema: public.webhook_integrations, public.notification_logs

Event-driven alerting for blockers, leaves, offer acceptances, and audit log tracking.

QA Test: Simulated webhook payload dispatch, verified status 200 payload logging in notification_logs.

6. Architecture & Security Specifications

Database Engine:	PostgreSQL 17.11 hosted on Supabase (uchjkqragyvtoriflmjp), connected via pg client pool.
Access Control:	Row Level Security (RLS) active on all 21 tables; unauthenticated client operations allowed via permissive policies.
Frontend Framework:	Next.js 16.3.3 App Router with React 19, Tailwind CSS v4, Lucide icons, and zero TypeScript compiler warnings.
Design Guidelines:	Consistent dark agency aesthetic (#050506 background, #111015 surface cards, #7727ff primary purple accents).
Data Integrity:	Idempotent schema definitions, foreign key cascades, and unique constraints ensuring strict auditability.
