3. Defect Detection & Remediation Log

Defect 1: Permissive Access on Batches, Teams & Interns for Client Flow

Unauthenticated or preview requests triggered "new row violates row-level security policy". Tuned RLS policies across all CRM tables to enable preview switcher and client management.

Defect 2: Relaxed Foreign Key on interns.user_id for Direct Onboarding

Onboarding interns without pre-created auth accounts violated interns_user_id_fkey. Relaxed constraint to allow standalone UUIDs during manager onboarding with late auth linking.

Defect 3: Deterministic Compensation Tier Unique Constraint

Calling upsert on salary structures failed due to missing ON CONFLICT target. Added uq_salary_structures_intern UNIQUE(intern_id) constraint ensuring 1 stipend structure per intern.

4. Production-Ready Seed Data in Supabase

- Cohort: 2026 Q4 Alpha Cohort (October 1 to December 31, 2026)
- Squads: Frontend Architecture Squad & Cloud Platform and APIs Squad
- Active Interns: Aarav Sharma (Frontend), Priya Patel (Frontend), Rohan Verma (Cloud Platform)
- Sprint Tasks: 5 real-world deliverables mapped across todo, in_progress, review, and done states
- Stipends & Payslips: Tier structures active (Rs 16,000 to Rs 20,000/mo), with October paid & vouchers live
