7. Recommended 5-Minute End-to-End Testing Walkthrough

Step 1: Launch Dev Server

Run `npm run dev` in your terminal. Ensure the server is listening on http://localhost:3000.

Step 2: Test Public Funnels

Open `/apply` and submit a test candidate. Then visit `/offer/00000000-0000-0000-0000-000000000001` to test digital offer signing. Visit `/verify/DS-2026-CERT-001` to test certificate validation.

Step 3: Test Admin CRM Hubs

Navigate to `/admin/crm/applications`. Use Command+K to search and jump to `/admin/crm/leaderboard` to award XP (+150 XP), `/admin/crm/reviews` to rate a PR, and `/admin/crm/evaluations` to view the PPO matrix.

Step 4: Test Intern Workspace

Navigate to `/portal`. Click on the persona switcher in the top right and toggle between Aarav, Priya, and Rohan. Click through all 9 tabs to verify real-time data binding from Supabase.

Step 5: Test Webhook Alerting

Go to `/admin/crm/integrations` and click "Send Test Webhook Ping" to simulate a live Discord/Slack payload and observe the dispatched audit log record.
